

Gravity Series

Smooth. Strong. spLIFE.

Gravity Series ropes combine the flexibility of Fly with the strength of Tachyon, offering smooth handling, low stretch, and long-lasting durability. Designed in collaboration with professional Ambassadors, Gravity features a double-braided kernmantle construction, a compacted core for precise control, and spLIFE termination for compliant third-party splicing. Its 11.5 mm diameter ensures compatibility with standard arborist hardware. Available in vibrant Aurora and Nebula colorways, Gravity meets EN 1891A and ANSI Z133 standards and supports a 10-year lifespan. A rope built from the field, for the field – Gravity lets climbers define their own gravity.

Specifications

Core: Nylon
Cover: Polyester
Standards: EN 1891A
 ANSI Z133
Braid: 24

Features

- Available with spLIFE
- Extremely smooth handling
- Minimal sheath slippage
- Low stretch
- Less bounciness

11.5 mm
Aurora

11.5 mm
Nebula
