

Double-braid arbor climbing lines that are fully-certified

- Low Elongation
- High Strength
- Firm, smooth sheath keeps core free of debris
- Suitable for SRS and MRS
- Meets ANSI Z133
- Meets CE EN 1891 Type A

The Scion provides the perfect balance of control and efficiency making it ideal for MRS and SRS climbing techniques. The 11.5 mm Scion is a double-braid rope featuring a burly polyester 24-strand sheath and a steam-stabilized braided nylon core, and engineered to have decreased elongation, soft handling, and easy knotability. The smooth, durable sheath is designed to handle mechanical devices and run efficiently through hardware. Available in two vivid color patterns, the 11.5mm Scion can't be missed up in the tree. The Scion can be hand-spliced.

Specifications	Scion
Diameter (mm)	11.5
MBS Rating (lb/kg)	6,744/3,065
MBS Rating (kN)	30.0
Spliced Eye MBS Rating (lb/kg)	6,000/2,727
Spliced Eye MBS Rating (kN)	26.7
Elongation 50-150 kg (%)	2.5
Elongation at 540 lb (%)	2.7
Weight lbs/100'	6.1
Weight g/m	91
Sheath/Core Percentage (%)	48.1/51.9
Sheath/Core Material	Polyester/Nylon
Certification	EN 1891 (A) ANSI Z133
Lengths Available	120, 150, 200, 600' 37, 46, 61, 183 m
